

PRESS RELEASE

The ProHost® Housekeeping System has been selected for the 420 room
Hard Rock Hotel San Diego

November 27, 2007— Hostar International, Inc. is pleased to announce that the recently opened Hard Rock Hotel San Diego chose the Luxury/Boutique ProHost® System for their housekeeping operations.

The Hard Rock Hotel located in San Diego is a mix of rooms and suites. It is located near several major business institutions, The San Diego Convention Center, shopping and tourist attractions.

The Hard Rock Hotel San Diego offers luxury in both guestroom amenities

and facility design. The building was originally designed to house condominiums with limited service areas on every floor. The ProHost® System was chosen to help solve housekeeping storage challenges. The program provides consistent service to their guests while maintaining a high level of productivity and employee satisfaction. The ProHost® System allows the hotel to be efficient in their material delivery, maintain a smart look, and protect their facility.

Hostar International, Inc.
Mobilizing Smart Hotels®

The ProHost® System, designed and developed by Hostar International, Inc. provides the technology needed to meet operational objectives in the heart-of-the-house. The ProHost® System combines process, methodology, and equipment to ensure seamless, just-in-time delivery of finished linens and supplies to the guest floors. The process was custom tailored to meet the operational objectives while adapting to the layout of the hotel.

Hostar International, Inc. provides material distribution solutions for hotel housekeeping and food and beverage operations. The company offers a range of services and equipment including process flow analysis, installation and training services, system design, and custom configured equipment. In business since 1989, Hostar's worldwide customer base ranges from 150 room luxury boutique hotels to 3,000 room mega properties.

Sales representative offices are located in Dallas, Dubai, Los Angeles, Macau, New York, Seattle, Singapore and Sydney. ProHost® equipment is assembled and shipped from Hostar facilities in Newbury, Ohio, USA.
