

Hostar International, Inc. delivers intelligent equipment combined with full service design and implementation of material-handling systems. Hostar offers a variety of services and programs to allow hotel operators and owners to select the programs that best meet their budget and operational requirements.

System Services

Hostar International, Inc. offers professional material management planning, housekeeping operational analysis, space and process planning for opening and existing properties.

System set-up and operational training are provided to ensure that managers and employees are proficient with their new ProHost® program.

For opening hotels, Hostar offers in-room cleaning training for room attendants and supervisors.

Mobiles for Room Attendants and Turndown

For room attendant operations, Hostar provides a variety of sizes and configurations of Mobiles to replace traditional maid's carts.

Furniture grade appearance, internal flexibility, door and lock features, ergonomic design and optional power assist combine to deliver outstanding function and equipment value.

Mobiles for Luxury & Boutique Properties

Hostar's Invisible Housekeeping program achieves "cartless" appearance in the guest hallways while providing room attendants with a tool to dramatically increase productivity.

ProHost® Handy Suppliers go into the guest room during cleaning and provide easy access to amenities, supplies and cleaning tools.

Obtain true one-trip per room efficiency while improving consistency and quality services for the guests.

Power Assist Option

Power assisted Mobiles are revolutionizing the workday for housekeeping attendants. Power assist option allows transport of linen and terry effortlessly through guest hallways with just the touch of a button.

Back strain and fatigue associated with moving linen and supplies are virtually eliminated. This innovative Hostar feature has become an important tool for recruiting and retaining valuable employees.

Out-of-Sight Collection of Linen and Trash

The Mobile Collector is a closed container designed to go inside the guestroom for optimum guest floor appearance during housekeeping operations.

All ProHost® Mobiles provide locations for carrying upright vacuums, chemical caddies and other cleaning tools.

The Super Collector is designed for efficient collection by house attendants while offering furniture grade appearance in the guest hallways.

Accurate Distribution and Control of Linen and Terry

An integrated delivery program for linen and terry is custom designed for each property. The replacement par inventory program operates without expensive bar coding or individual piece counting.

Totes are delivered to the point of use on each guest floor in an appropriately designed mix of Mobiles, Super Suppliers and Tote Carriers.

This integrated combination of totes and multi-use Mobiles eliminates traditional maid's carts, linen closet shelving, and house attendant linen distribution carts.

Optional tambour doors and locks on Mobile Suppliers, Juniors and Super Suppliers provide increased item security.

In many newly constructed hotels, ProHost® Mobiles are allowing the elimination of lockable linen closets on every floor, returning space for revenue generation.

Modest increases in the size of service landings can create adequate circulating and parking space for ProHost® Mobiles.

For distributed properties, Hostar offers custom transport vehicles for delivering and collecting clean and soiled linen Mobiles from remote buildings.

Control of Amenities and Supplies

All supplies flowing into the guestroom are organized into daily par quantities and distributed from a centralized inventory control point.

Exchange totes for bathroom amenities, coffee & tea, room supplies and glassware are organized on rolling racks in the Pick Station.

During the restocking process, depleted totes from the housekeeping Mobiles are exchanged with a replenished totes from the Pick Station.

Specialized organizers for paper products, coffee and tea supplies, glasses and mugs are part of the ProHost® System.

Purchase versus Lease

Hostar International, Inc. offers both purchase and lease options. Many hotel operators are leasing the ProHost® System with savings that exceed their monthly lease payments.

Phased Implementation

Phasing provides a means to implement a ProHost® System in stages, spreading the investment over a period of time. Phasing allows acquisition of a ProHost® System without postponing other capital expenditures or delaying the opportunity to provide modern productivity tools for heart-of-the-house operations.

Summary

The ProHost® System is the only housekeeping materials management program that generates significant savings for each occupied room night.

Please contact a Hostar sale associate for more information. Modernize your Heart-of-the House operations.
