

Save Room Attendant Time on a Daily Basis

Compare ProHost® efficiency with traditional daily activities

THE CHALLENGE

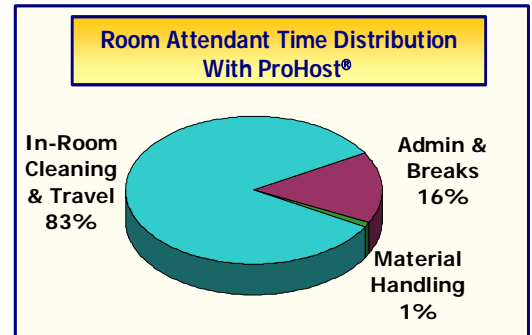

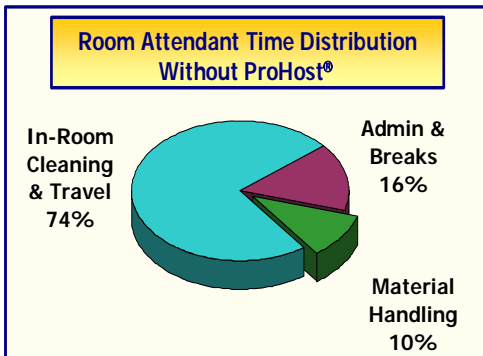

Hotel owners and managers operate in an environment that demands increased efficiency and productivity. Simultaneously, hoteliers must also meet their customers' desire for quality service. The ProHost® System provides hoteliers with the technology to meet both of these goals.

THE SOLUTION

- The ProHost® System combines process and equipment to ensure seamless, just-in-time delivery of finished linen and supplies to the guest floors.
- The family of **Mobiles** and **Totes** deliver program-loaded quantities matched to each floor and section.
- Each ProHost® System is customized to work within the physical layout of each individual hotel.
- The process is designed to complement the operational goals and objectives of management.

PRODUCTIVITY

ProHost® System clients report that room attendants can complete daily assignments 30 to 45 minutes **faster** using the ProHost® System. Time that room attendants had previously devoted to loading and handling activities can be reassigned to gain greater employee productivity and to enhance guest services.

Activity/ Minutes per Day	Traditional Operations	ProHost Operations
Start-up, Assignment & Keys	15	15
Initial Cart Stocking	10	0
Lunch & Breaks	60	60
Mid-Day Cart Restocking(s)	10	5
Missing Item Events	5	0
End of Day - Main Cart Restocking	25	0
Time Available In-Room Cleaning & Travel	355	355
Additional In-Room Cleaning Time & Travel	0	45
Total Minutes	480	480
Net Time Savings per Day per Room Attendant		45

FINANCIAL PAYBACK

Improved productivity generated by the System yields significant long-term savings. Expense reductions are realized through centralization and just-in-time inventory capabilities. *The ProHost® System typically pays for itself in two years to three years.*

ProHost® operations compared to traditional operations

**MOBILIZING
SMART HOTELS®**

The ProHost® System is the first material handling and distribution product designed specifically for hotels and resorts. A dynamic management tool, the ProHost® System works to improve productivity, quality standards and inventory control. The System delivers operating efficiency, enhances guest corridor appearance and improves employee morale.
