

ON FLOOR OPERATIONS WITH PROHOST® MOBILES

Mobile Suppliers carry all the items needed by room attendants for making up guestrooms. Totes are pre-packed with linen and supplies and color coded for item identification. Optional tambour door and lock protect contents.

Mobile Collectors provide out-of-sight collection of soiled linen and trash. Supplier and Collector can be hitched together for travel between the closet and section.

Super Suppliers and Tote Carriers carry additional linen and terry totes and are parked in guest floor linen closets.

Mid-day, room attendants replenish their Mobiles by driving to the linen closet and exchanging totes between their Mobile Supplier and reserve unit.

ProHost® Power Assist
Eliminates the challenge of long travel distances on thick carpets.

IMPROVED INVENTORY CONTROL

Centralized Inventories
Bulk cartons of amenities, supplies, and clean processed linen are centralized in secure holding areas near housekeeping.

ProHost® Pick Stations neatly organize supplies on slanted shelving for easy access and efficient stocking of exchange totes. Pick Station Tote Carriers, filled with replenished exchange totes, are then moved to the restocking area.

The Restocking Process begins after room attendants finish their day. Mobiles and Tote Carriers are brought to the restocking area three to four at a time.

EFFICIENT AND ACCURATE DISTRIBUTION

Laundry bins are staged for efficient production packing of linen and terry into the Mobiles.

Minimum handling is required, as items move directly from the laundry bins to the totes in the Mobiles.

Depleted amenity and supply totes from the Mobiles are exchanged with full ones from the exchange tote racks.

Fully replenished Mobiles are locked and returned to their floors and linen closets.

Consulting Services
Hostar International, Inc. offers professional planning and implementation services for the hospitality industry.

ProHost® System customers may also contract for in-room cleaning training for housekeeping staff.
