

## CONFIGURATION OPTIONS

ProHost® equipment's internal flexibility is illustrated above. The dashed lines show the relative internal capacities of Junior Suppliers, Mobile Suppliers and Super Suppliers. Illustration #1 shows the addition of a center panel to create two equal bays for S-Totes, S-Trays, bag holders or hanger rods. The addition of a Side Vender Bearer on the upper right or left side of the Mobile shell creates a rail for the H-Totes. Rail modules are based on 2-inch increments.

*Illustration #2 shows a Mobile shell without a center panel. Shelves create easily adjustable horizontal storage. The T-Shelf, shown above, blends the use of horizontal shelving with Tote bays below. A Center Vender Bearer, or combination of two Side Vender Bearers at the right and left, supports Totes at the top of the Mobile.*

#### PROHOST® TOTES, TRAYS & ORGANIZERS

#### H-TOTE & VENDER BEARER, SIDE VENDER BEARER, SIDE ASSEMBLY

##### DESCRIPTION

H-Tote for transport of small items. Available with or without a handle. Vender Bearer, Side Assembly is required to carry H-Totes inside a Mobile equipped with a Center Panel (one required for two H-Totes and two required for four H-Totes).

H-TOTE WITHOUT HANDLE

#### DESCRIPTION

This simple, ergonomically designed ProHost Mobile Chemical Caddy is lightweight but has excellent capacity. The polyethylene caddy holds four 24 ounce chemical bottles, one cup holder with toilet brush and has a separate compartment for a sponge or scrubby (bottles and cleaning tools not included with caddy). The stainless steel handle and bracket is balanced for control and stability when transporting by hand or sitting on a bathroom floor. The bracket easily slides over the Mobile's handle for transport from room to room.
