

INTRODUCTION TO BACKBAR PROGRAM

Combining process, methodology and specialized equipment, the ProHost® Backbar program delivers Backbar inventory in an efficient and attractive manner. The program provides exacting control of high-value liquor stock through the entire inventory cycle. ProHost® Backbar streamlines distribution and setup activities for banquet bars.

For more information on how the ProHost® System can positively impact your hotel or resort operation, contact Hostar International, Inc.

The ProHost® Backbar program reduces unaccountable losses. Bottle for bottle exchange prevents inventory being lost or stolen. Secure storage in the delivery phase reduces breakage. Empty and partial bottles are returned to the central storage area to allow consumption to be measured precisely. Current users estimate beverage costs reductions of 5%.

BACKBAR MOBILE WITH OPTIONAL SKIRTING**BACKBAR**

With program loaded ProHost® Backbar Mobiles completely stocked and ready to go, set up time is significantly lower. Current users report shift reductions of as much as one hour per bartender, and reductions on bar porter labor by as much as 25% to 40%.

CAPACITY

A standard Mobile Supplier for Backbar accommodates the following quantities of bar inventory: (32) 750 ml Bottles, (4) 325 ml Bottles, (80) 12 oz. Bottles, (32) 750 ml Bottles of Wine. Average revenue capacity per Backbar Mobile is \$3,000 to \$4,000.

GUEST SATISFACTION

ProHost® Backbar Mobiles add total flexibility to accommodate quick responses to guest requests or changes in function space. Accurate billing minimizes discrepancies--all enhancing professionalism and guest service.

Dramatic improvements in guest services and faster function setup and breakdown are now available with the ProHost® Banquet/Meeting Setup System. It is possible to preserve the quality of table linen by delivering it directly from the ironer/folder to function and dining areas, as well as enhance the polished image of the hotel or resort by transporting clean and soiled items unobtrusively through public spaces.

Using a performance criteria created by hoteliers, ProHost® gives F & B managers the power to provide superior service to customers while simultaneously improving profitability.

For more information on how the ProHost® System can positively impact your hotel or resort operation, contact Hostar International, Inc.

MINIBAR RESTOCKING SUPPLIERS

MOBILE JUNIOR SUPPLIER

DESCRIPTION

ProHost® Mobiles allow for a smooth and controlled delivery of minibar items to guestrooms. Power Assist revolutionizes the delivery abilities of minibar attendants. Back strain and fatigue associated with moving heavy loads are virtually eliminated with the power option for ProHost® Mobiles. Roll-up tambour door with security lock secures contents. The Junior Supplier with its low profile and 11 cubic foot capacity is ideal for organizing specialized, limited inventories and for travel through public areas.
